

# BENTGRASS HIK (WSF)

## 20 – 2 – 25 + FE

- ✓ 70% of N as UMAXX stabilised Nitrogen for efficient delivery to turf.
- ✓ Combination N sources with low P, soluble K and Fe.
- ✓ Uniform growth, deep root mass and consistent colour for 12-16 weeks.
- ✓ Water soluble fertiliser (wsf) for tees and fairways.

### TECHNOLOGY

UMAXX stabilised Nitrogen is a premium slow release technology that performs beautifully regardless of soil temperature or weather. This is achieved through reduced volatilisation, denitrification and leaching meaning more usable Nitrogen is delivered to the turf as it is needed.

### USE PATTERNS

Use this product on tees, fairways and high performance sports (especially those with sandy profiles) for enduring colour and vigour and to top up trace elements.

### APPLICATION RATE

Rate/ha	N/ha	Spray Volume	Comments
20kg	0.5kg	4L	Leave to dry on foliage
35kg	1.0kg	4L	Leave to dry on foliage
50kg	1.5kg	4L	Water in with 3-5mm irrigation
65kg	2.0kg	4L	Water in with 3-5mm irrigation
80kg	2.5kg	4L	Water in with 3-5mm irrigation

\*If turf is stressed or daytime temperatures are high dilute further and / or consider immediate irrigation.

### GUARANTEED ANALYSIS

Total	%
Nitrogen	20%
Stabilised UMAXX N	14%
Nitrate N	6.0%
Phosphorus (P)	2%
Potassium (K)	25%
Iron (Fe)	0.4%
Sulphur	3%
