

CONTROL K (195sgn)

21-1-15

- ✓ Duration – Resin coated fertiliser for reliable nitrogen delivery.
- ✓ 80% controlled release N and elevated K to match turf growth.
- ✓ Perfect for year round feeding to pre-condition turf against stress.
- ✓ 195sgn (average particle = 1.95mm) with up front and slowly available N.

TECHNOLOGY

All Nutrite products combine the colour benefits of Nitrogen with the stress management benefits of Potash. The Duration technology is the leading controlled release nitrogen for reliable response to match growth regardless of climate.

USE PATTERNS

Use this product in autumn and winter on higher cut turf to maintain colour and replenish Potassium easily lost in turf profiles. Use at the rate of 125-250kg/ ha depending on colour requirement and Potassium amendment necessary.
