LIQUID PLANT NUTRITION

EXTENDED GREENING & VITALITY OF MANAGED TURF

UNIQUE FEATURES

- » Specially formulated high analysis stabilised liquid Nitrogen fertiliser.
- » Stabilised Nitrogen for long lasting feeding of turf.
- » 6% Iron for deeper green colour and greater turf vitality.
- » 1% Magnesium for enhanced chlorophyll production.

TECHNOLOGY

Based around a stabilised form of Nitrogen, this product extends the period of feeding from a single application by moderating the activity of enzymes that deplete Nitrogen in soil. By gently metering the Nitrogen as turf requires it, and combining this with other nutrients known to enhance the production of chlorophyll in leaves, nutrient use is optimised and deep green growth occurs without softness or surging.

GUARANTEED ANALYSIS W/V%

Total Nitrogen	20%
<i>20% Nitrogen (as stabilised Urea)</i>	
Total Iron	6%
<i>6% Iron (as Sulphate)</i>	
Total Magnesium	1%
<i>1% Magnesium (as Sulphate)</i>	

APPLICATION RATES

On greens and fine cut turf.	200-500mL/100m ²
Fairways and higher cut turf.	20-50L per Ha

SPRAY VOLUMES

On greens and fine cut turf.	6-10L/100m ²
Fairways and higher cut turf.	400-1000L per Ha
