

UFLEXX™: NITROGEN PERFORMANCE SOLUTIONS

UFLEXX is a stabilized nitrogen fertilizer formulated for the professional lawn care, retail, landscape, golf course and specialty markets. It delivers a medium-duration source of usable nitrogen for application flexibility.

IMPROVED NITROGEN EFFICIENCY

UFLEXX is good to the turf and to the environment. UFLEXX reduces nitrogen loss due to volatility, leaching and denitrification. The result is an excellent nitrogen source with less burn potential, steady turf growth and exceptional color.

According to research, at least 30 percent of the nitrogen from urea can be lost into the atmosphere through volatilization, often within days of application.

UFLEXX is formulated with a unique inhibitor that blocks urease. This helps minimize nitrogen loss to the atmosphere and provides time for rainfall and irrigation to effectively transport nitrogen to the root zone for plant utilization. UFLEXX also contains a nitrogen stabilizer that reduces nitrogen loss due to leaching and denitrification, keeping the nitrogen stable and available when the plant needs it.

FLEXIBILITY

- Performs consistently regardless of soil temperature or weather
- Performs equally well as a granular nitrogen component in blends or as a soluble nitrogen source
- Compatible with typical tank mixes
- Provides exceptional turf color and quality
- Delivers quick green-up without burn
- Provides consistent color response for 6 to 8 weeks
- Improves nitrogen efficiency and performance
- Provides cost savings over most competitive nitrogen sources
- Perfect for professional lawn care specialists, retailers, landscapers and specialty markets
 - Corporate grounds
 - Athletic fields
 - Parks and other green spaces
 - Residential lawns
 - Golf courses

LOWER RATES, GREAT RESULTS

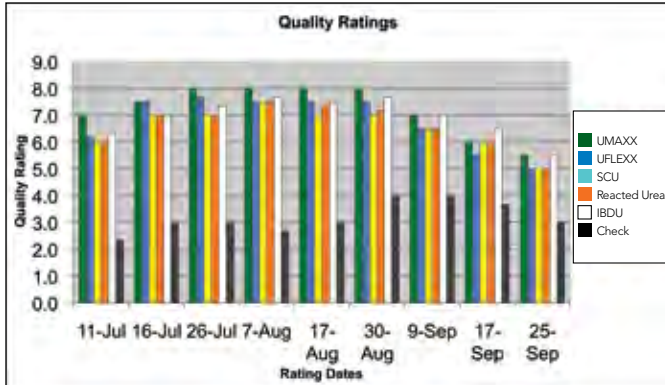

"I really like the flexibility of the product and being able to increase or decrease the rate. I get a nice deep green color that lasts 6 to 8 weeks. I am able to use less nitrogen and get the same results than with higher rates of other products."

Tom List, Owner

UFLEXX™
STABILIZED NITROGEN

PROVEN RESULTS

In university trials, UFLEXX performed as well as traditional slow-release nitrogen for up to 8 weeks after application on both cool-season and warm-season grasses.

Application July 5, 1 lb/1,000 sq. ft.

Source: Ohio State University, Kentucky bluegrass study.

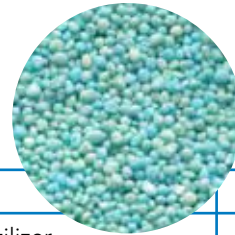

DIRECTIONS FOR USE IN SOLUBLE FERTILIZER PROGRAMS

Pounds of UFLEXX™ Per 100 Gallons				
Delivery Rate	Coverage (Sq. Ft.)	1#N/M	.75#N/M	.5#N/M
2	50,000	110	82	55
2.5	40,000	88	66	44
3	33,000	72	55	36
3.5	28,750	62	47	31
4	25,000	55	41	28

Delivery Rate = Gallons/1,000 sq. ft.

UFLEXX PRODUCT SPECIFICATIONS

Product	Analysis	Grade	SGN	Uses	Classification
UFLEXX	46-0-0	Regular	240	As an ingredient in dry or liquid fertilizer blends. Can be applied directly or melted down for spray application.	Stabilized Nitrogen
UFLEXX	46-0-0	Mini	150	As an ingredient in dry or liquid fertilizer blends. Can be applied directly or melted down for spray application.	Stabilized Nitrogen
