GENERAL INSTRUCTIONS**INSECTICIDE RESISTANCE WARNING****GROUP 2B INSECTICIDE**

For insecticide resistance management, IMPEDE is a Group 2B insecticide.

Some naturally occurring insect biotypes resistant to IMPEDE and other Group 2B insecticides may exist through normal genetic variability in any insect population. The resistant individuals can eventually dominate the insect population if IMPEDE or other Group 2B insecticides are used repeatedly. The effectiveness of IMPEDE on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, BASF Australia Ltd accepts no liability for any losses that may result from the failure of IMPEDE to control resistant insects.

IMPEDE may be subject to specific resistance management strategies. For further information contact your local supplier, BASF representative or local agricultural department agronomist.

APPLICATION

Apply IMPEDE evenly to the surface of turf using a granule applicator. IMPEDE granules must be incorporated with at least 6 mm of rainfall or overhead irrigation immediately after application.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate streams, rivers or waterways with the chemical or used containers.

PROTECTION OF LIVESTOCK

DO NOT graze treated turf or feed turf clippings from any treated area to poultry or livestock.
