

NX GOLD (195sgn)

29-0-8

- ✓ 36% of N as MESA for immediate turf response and extended Nitrogen feeding.
- ✓ Delivers excellent colour and vigour whilst strengthening the turf sward.
- ✓ Ideal where solid N is required in combination with zero Phosphorus.
- ✓ 195sgn (average particle = 1.95mm) for fairways and higher cut turf.

TECHNOLOGY

All NX-PRO products combine the colour benefits of Nitrogen with the stress management benefits of Potash. Part of the brilliant colour response comes from the MESA technology which is a homogeneous mix of Methylene Urea 40-0-0 and Sulphate of Ammonia.

USE PATTERNS

Use this product in spring and summer on higher cut turf to obtain colour and vigour with the benefit of additional strengthening of the turf sward from the blended Potassium. Use at the rate of 90-180 kg / ha.
