

MP TERRAMAX[®] (120sgn)

Turf Underlay Fertiliser

8-1-8

Slow release as MU

- Homogeneous formulation for uniformity of distribution
- High Carbon formula builds healthy soils
- Slow release Nitrogen powers sustainable turf growth
- Calcium and magnesium to balance soil chemistry
- 5% Crystal Rain (next generation acrylamide free water crystals)
- Concentrated humates enhance nutrient turnover & availability
- Developed and manufactured in Australia

TECHNOLOGY

MP Terramax contains Leonardite brown coal, which is commonly known as the best source for extraction of high grade potassium humate, a powerful soil conditioner. As a fertiliser additive, Leonardite is credited with increasing the availability of nitrogen, phosphorus and trace elements. By employing this unique additive, MP Terramax is able to deliver significantly higher quantities of pure element carbon than liquid humic fertilisers. The incorporation of Crystal Rain water crystals ensures that water is available for the turf roots during time of establishment.

SPREADER SETTINGS

	Desired rate	
	5 kg / 100 m ²	10 kg / 100 m ²
Scotts Accupro 2000 (Cone Setting 7) Swathe width approx. 3.3 m	P	T
Lesco (letters)	M	R
Lesco (numbers)	26	30
Spyker	6	7
Gandy	34	42
Vicon	32	42

*The spreader settings are close approximations. Trial calibration is recommended before wide spread use.

USE PATTERNS

MP Terramax can be applied prior to laying down new turf or can be incorporated into the seed bed when sprigging. The water retention, nutritional and soil amendment qualities of MP Terramax increases the rate of establishment during the early stages.

GUARANTEED ANALYSIS

Total	%
Nitrogen (N)	7.6
Ammonium	0.5
Methylene Urea	7.1
Phosphorous (P)	0.9
Potassium (K)	7.6
Sulphur (S)	8.3
Calcium (Ca)	3.9
Magnesium (Mg)	1.2
Carbon (C)	6.7
Humate	11
Crystal Rain	5
