

RENOBLEN™ 16-2-9

Traces + Carbon + Beneficial Microbes

180 SGN

- 55% of N as UMAXX® nitrogen
- 5% MP Tripleplay® granular wetting agent
- Full spectrum of trace elements
- GranU Carb 3A™ biologically activated carbon for soil development
- Contains over 20 different types of plant beneficial microbes
- Strong root development

TECHNOLOGY

Renoblen™ 16-2-9 fertiliser is a complete blended mineral based fertiliser with 55% of Nitrogen as UMAXX® technology and with a full range of macro and micro nutrients.

GranU Carb 3A™ supplies a biological food source for rapid establishment of the microbial component of Renoblen™ 16-2-9 thus ensuring sustained populations.

Each granule has been biologically coated with over 20 different species of beneficial microbes designed to aid in biological plant and soil health. The microbes included are plant beneficial strains of Mycorrhiza (VAM), Rhizobium and Bacillus. This formulation is designed to maximise turf health by providing balanced nutrition leading to strong root growth, re-activation of locked-up soil nutrients, minimising leaching and boosting beneficial soil microbes.

USE PATTERNS

Apply Renoblen™ 16-2-9 at renovations for soil biology development, to increase carbon content and to ensure strong recovery.

Apply Renoblen™ 16-2-9 at 2 - 5 kg / 100 m² (200 – 500 kg / ha)

SPREADER SETTINGS
