## Let us take care of it for you

Living Turf provides professional turf managers with a complete product distribution and agronomic consultancy service with the ability to diagnose, recommend, supply and apply tailored product solutions.

Living Turf offers a highly customised and holistic professional turf service, from laboratory testing using our comprehensive turf pathology system, My-Results and supported by expert agronomic advice and consultancy services from our team of trusted and qualified field representative through to product supply and our dedicated contract application service, Precision Turf.

### The Living Turf difference

- Convenient, safe and cost effective spray and spread application services
- Experienced and Chemcert qualified spray technicians
- Specialised product selection and maintenance programming
- Spraywise endorsed purpose-built spray vehicles fitted modern technology and equipment
- Commitment to high safety and environmental standards for a safer workplace, reducing the necessity of chemical handling

### Our Team

We operate a team of 3 dedicated and experienced Living Turf spray technicians, all qualified Greenkeepers and Chemcert accredited each with over 10 years experience in professional turf.
