20-2-5 + Traces + Biology

SGN 150

MP Spectrum[®] Mini provides turf with a full range of plant nutrients. Carbon coated urea provides nitrogen to the plant without loss through volatility. Biologically enhanced with over 20 species of microbes including Mycorrhizal fungi and phosphorus solubilisers (such as *Bacillus megaterium*) combined with a biological food source to develop larger, more effective root systems to access locked up soil and applied nutrients and soil moisture.
