140 SGN  
Iron + Manganese

- 100% of Nitrogen as UMAXX, for safe and steady turf response
- Added Iron and Manganese for enhanced colour and enhanced assimilation
- Apply year round where steady and long term Nitrogen feeding is desired
- UMAXX slow release technology consistently supplying nitrogen for 10-12 weeks slow release of Nitrogen to the plant

## TECHNOLOGY

UMAXX stabilised Nitrogen is a premium slow release technology that performs regardless of soil temperature or weather. UMAXX technology contains two stabilisers that minimises losses due to volatilisation, denitrification and leaching. The result is a combination of up-front and sustained measure Nitrogen release to turf plants.
